

MHD Stability and 3D Response

VAFT Introductory Tutorial | Session 05

Why this session exists

- ▶ Connect equilibria to ideal and resistive linear-stability analysis.
- ▶ Introduce three-dimensional control fields and plasma response.

Session workflow

equilibrium $\rightarrow$ DCON/RDCON/GPEC $\rightarrow$ metric or mode $\rightarrow$ physical interpretation

Practice goal: interpret stability

Learners will connect solver metrics and mode information to the class of instability or three-dimensional response they support.
